

In the chilly days of winter
We'll swiftly move to foster
New thought now at the center
Of the Cohort 08 roster

Forms of communication
Intercultural and nonverbal
Will offer a foundation
Rife with spice and flavors herbal

You'll ponder things aesthetic
And ethical decisions
Might values be genetic
Or morality collisions

You'll join a whole new readership
With a humanistic tone
While honing skills of leadership
In this skill set building zone

Try principled negotiation
Note ambient surrounds
And all will offer preparation
To challenge shifting grounds

Now some may offer words of warning
Don't pay them any heed
You won't be sleep deprived for morning
If Cohort-7 takes the lead.

Autumnal days bring focus
Of the multidisciplinary sort
We'll join as a CIIP locus
Steer solutions into port

But once we have solutions
For managers to adapt
You won't sell these contributions
Unless your leadership is apt.

Example, analogy, authority, cause
Haptics, proxemics and logic
Just a few of the terms that may give you pause
Set aside the biologic, geologic
Eschew the demagogic, embrace the ontologic
Reconsider technologic, just include the analogic ...
This incites the neurologic
So relax for now ... and just remember
We'll see you in January, right after December.
