

A UNIQUE OPPORTUNITY IN COASTAL SCIENCE AND POLICY

*Creating environmentally, economically,
and socially sustainable coastal environments*

The Coastal Institute at the University of Rhode Island, an international leader in coastal and marine science and policy, is offering five traineeships. This NSF-funded “Integrative Graduate Education and Research Traineeship” (IGERT) Project is supporting a new generation of Ph.D.-level graduate students to study coastal science and policy.

Summer practicum stressing field work to acquire technical skills

\$30,000 stipend for the first two years, plus access to research grants in the following years

Budget to organize weekly seminar series featuring world authorities on coastal and watershed issues

A nine-month funded placement with a partner organization – federal, non-profit or national institute

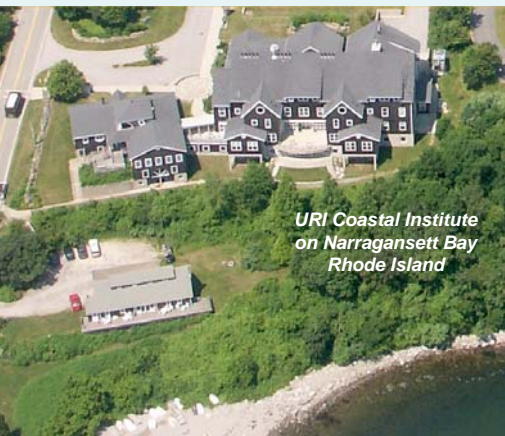

Training in ethics, social equity and intercultural issues

Intensive course in logic, communication and leadership

Small tutorials on communicating with the public and media relations

*URI Coastal Institute
on Narragansett Bay
Rhode Island*
